

JLG Forklift Part

JLG Forklift Parts - Following retirement in the late 1960's, John L. Grove started out on a cross country RV trip. After spending many years establishing his family built crane business with his brother, John had no idea that this journey would bring about the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision materials handling equipment was the end consequence of a road expedition.

While on their journey, John spent time conversing with past business associates whom the Groves stopped to see along the way. These conversations combined with a tragic event-two workers being electrocuted on scaffolding when the Groves were visiting Hoover Dam- John uncovered a substantial market for a product that could promptly and safely elevate individuals in the air to accomplish upkeep and other construction functions.

Upon returning from their travels, John formed a partnership with two friends and purchased a metal fabricating business in McConnellsburg, Pennsylvania. In 1970, opening operations with a crew of twenty personnel, they designed and sold the first JLG aerial work platform. The business incorporates some of the simple design essentials of that original lift into current designs.

Since then, JLG Forklifts have come a great distance from when Mr. John L. Grove returned from his fateful cross-country trip and since the first JLG aerial platform entered the marketplace. As of today, the business has extended itself into many different global markets and continues to develop contemporary equipment to guarantee that customers are able to become safer and more well-organized within their workplace.
